

## Math Card Game

Credit goes to Pinterest and Top Notch Teaching

### I Spy With My Little Eye

This card game is for two players. You will need one deck of cards with the picture cards removed (40 cards remaining).

#### Instructions

1. The cards are dealt **face up** in an array, either a 10 x 4 or 8 x 5 array.
2. The first player challenges the other one to find two cards next to each other that add to make a particular number. **The first player says, "I spy with my little eye two cards that add to make \_\_\_\_\_."**
3. The second player then looks for 2 cards that add to make the number. The two cards to be added need to be next to each other either horizontally or vertically. The player then picks the cards up to add them to their pile. They do this with any other pairs that add to make the number as well.
4. **If the second player misses any pairs that add to the number, then player one may claim them.**
5. The players alternate taking turns and continue until all the cards are gone.
6. **The winner is the player with the most cards at the end of the game.**
7. As large gaps appear in the array, move the cards closer together to fill those gaps.

#### Variations

- You could change the operation that students use to subtraction.
- Allow your students to add three numbers together.
  - You could also allow students to add pairs of cards diagonally.
